

PERSONAL EXPENSE TRACKER

PROBLEM STATEMENT

- Financial condition of our life is based on our daily expenses.
- We can save our remaining money after it has been spent but if we are unaware of daily expenses there are possibilities of exceeding our expenses.
- It may leads to poor money management and the situation of falling into debts financially.
- It is the time where personal expense tracker plays it's role in saving daily expenses in the form of an application.
- The application ask the users to give their expenses details, based on their expenses wallet balance will be updated which will be visible to the user.
- When we exceed our estimated limit of our daily expense the personal expense tracker gives us an email alert.
- By getting the email alert we can check the application for the expense detail that we have spent beyond our limit.
- That's how we can save our money to provide a better financial growth.
