

The screenshot shows a Sublime Text editor window with a Python script named 'test.py'. The script is used to connect to an IBM Db2 database using the 'flask\_db2' library. The script includes the following code:

```
~/test.py (project) - Sublime Text (UNREGISTERED)
File Edit Selection Find View Goto Tools Project Preferences Help
app.py test.py
1 from flask import Flask
2 from flask_db2 import DB2
3
4 app = Flask(__name__)
5
6 app.config['DB2_DATABASE'] = 'bludb'
7 app.config['DB2_HOSTNAME'] = '98538591-7217-4024-b027-8baa77'
8 app.config['DB2_PORT'] = 30875
9 app.config['DB2_PROTOCOL'] = 'TCP/IP'
10 app.config['DB2_USER'] = 'pzv71168'
11 app.config['DB2_PASSWORD'] = ''
12
13 db = DB2(app)
14
15 @app.route("/")
16 def index():
17     c = db.connection.cursor()
18     c.execute("CREATE TABLE usertable (username varchar(255))")
```
