

ABSTRACT

Personal expense tracker is used to keep a track on our daily expenses and sends an email alert when we exceed our expense limit. To elaborately define the above sentence, Personal expense tracker is an application that the user can access it by giving their expenses details based on their expense wallet balance will be updated which will be visible to the user. Also, users can get an analysis of their expenditure in graphical forms. The details we add to the application get stored in the IBM cloud the each and every expense can be updated to the IBM cloud. We can set a limit for the expense. The main work of personal expense tracker starts when we exceed our estimated limit of our daily expenses, when we exceed our daily expense, the IBM DB which has been programmed by python gives us an email alert by integrating the sendgrid services. That's how the Personal expense tracker application helps and solves our financial problems.
